

**THE CENTRIFUGAL CLUTCH** engagement prevents belt slip when engaging the clutch which means fewer maintenance costs.

**25 HP (18.6 KW) EFI ENGINE** performs well during cold-weather starts, reduces occurrence of engine flooding and provides improved fuel economy over comparable carbureted gas engines.

**THE LARGE INFEED OPENING** 6" x 8" (15.2 cm x 20.3 cm) makes feeding irregular material easier and decreases the amount of saw cuts needed prior to feeding the chipper.

**THE EXCLUSIVE SMARTFEED CONTROL SYSTEM** from Vermeer helps increase operator productivity and reduces strain on vital engine parts, as engine rpm is monitored and feed rollers are controlled.

**ELECTRONICALLY SWITCHED BOTTOM FEED STOP BAR** is strategically located to make it possible for the operator's leg to strike the bar and shut off the feed mechanism either intentionally or automatically in an emergency situation increasing operator safety while feeding material.

**THE WIDE AXLE** offers an ample footprint at the axle for side-to-side stability; additionally enhances transportability and visibility while backing up.
