

# INTRODUCING VECTOR® COOLING SYSTEMS

A NEW ADDITION TO OUR RENTAL FLEET | SPECIALTY SOLUTIONS - CLIMATE CONTROL

**BATTLEFIELD**  **THE RENTAL STORE**

## Product Overview: Vector® Cooling System

Vector® is a sleek, water-powered air cooling solution that lowers temperatures by up to 25°F - without the use of refrigerants or high energy consumption. Engineered for commercial, industrial, and residential environments, it combines quiet operation, top-tier airflow, and refined aesthetics with durable, marine-grade materials. Its GFI-compatible system ensures a safe, cool, and breathable atmosphere while helping to reduce heat, airborne viruses, dust, mold, slip-and-fall accidents, and other health-related concerns.

## Key Features & Benefits

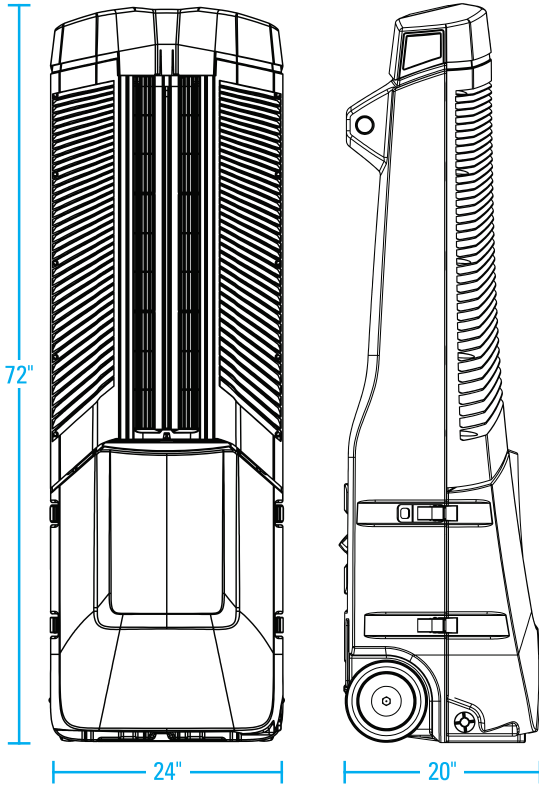

- Powerful Cooling:** Cools areas up to 2,200 sq ft with wind speeds of 48 - 64 km/h , lowering temperatures up to 13.9°C
- Proprietary Cross-Flow Smart Technology:** Delivers best-in-class airflow performance, with a self-monitoring system to ensure optimal operation. Intuitive with easy to use control buttons and intelligent LED lighting
- Quiet Operation:** Runs at the volume of a normal conversation - ideal for indoor use @ 59dB
- Sleek, Modern Design:** No visible screws; fits seamlessly into upscale environments
- Marine-Grade Construction:** Rust-proof and fade-resistant, even when left outdoors
- Child-Safe:** No exposed metal parts or open water tanks - safe for any environment
- Hygienic System:** Fully enclosed 57 litre water reservoir prevents contamination
- Low Maintenance:** Easy to clean - just hose it down
- Eco-Friendly:** Uses water to cool, with no refrigerants or chemicals
- Compact Footprint:** Just 24" x 20"; designed to sit flush against walls
- Portable:** Weighs only 135 lbs and is easy to move with all-terrain castors - just tilt and go

# INTRODUCING VECTOR® COOLING SYSTEMS

Providing flexible rental solutions to control temperature, humidity, and air quality in a variety of settings

STORE

## Versatile 5-in-1 Functionality

- A fan
- A humidifier
- A misting machine
- An evaporative cooler
- A turbo booster for indoor air conditioning (AC); ideal for homes, airports, malls, and retail spaces

## Industry Applications

- Aerospace & Aviation
- Hospitality & Resorts
- Agriculture & Greenhouses
- Sports Venues & Stadiums
- Retail (Indoor/Outdoor)
- Concerts, Tents & Outdoor Events
- Military & Emergency Services
- Government Facilities
- Cargo & Logistics
- Warehouses & Distribution Centers
- Hospitals & Healthcare
- Schools & Universities

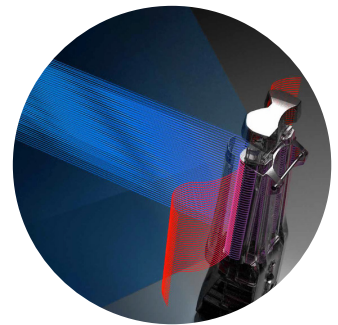

## Setup Requirements

- Standard Power Supply – 10 adjustable settings
- Low Energy Use – Consumes less electricity than a hair dryer
- Water Source – Fill the 57 litre onboard reservoir with tap water
- Optional Float Valve – For continuous water supply convenience
