

PURPOSE

Provide information about torque values for assembly of TCR hoist.

SCOPE

- Limited to the Harrington TCR hoist product line.
- Limited to fasteners for the hooks and chain.

INFORMATION

See Fig's 1 thru 6.

TORQUE – UNITS OF MEASURE

The values given in the following Fig's are in Kg-cm.

To convert these values to the English system:

$$\text{Kg-cm} \times [2.2046 \text{ lb/Kg}] \times [0.394 \text{ in/cm}] = \text{lb-in}$$

Example:

$$295 \text{ Kg-cm} \times 2.2046 \times 0.394 = 256 \text{ lb-in}$$
